Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 16-18,20,21,29-32,34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Van Mill (5,590,721).

Van Mill discloses a disc gang assembly including a mainframe 11 & 27, and a frame including a main beam 107 & 101, a disc support beam 115 located in front of the main beam, a plurality of support arms (102, 104, 106) and a plurality of ground engaging rotary discs (108, 109) which are configured to rotate about an axis that extends at a gang angle relative to perpendicular to said draft direction through a range of at least 3 degrees as shown in figures 1 & 2. Van Mill further discloses using a slot (119 & 121) and a pin for permitting angle adjustment (figure 2). Van Mill further discloses using a plurality of support arms pivotable to raise and lower the disc support beam relative to the main beam to adjust the cutting depth of the discs. Van Mill additionally discloses an actuator 137 extending wholly between the main beam and the mainframe, and ground engaging wheels 18.

Concerning claim 29, Van Mill discloses a main beam (115), mountable on a mainframe, and angularly offset with respect to the draft direction, with a disc support beam (not numbered but shown in figure 2 between discs 108 and beam 115) which is located in front of said main beam (as viewed in figure 4), with support arms (not

Art Unit: 3671

numbered, but 3 arms appear to be shown in figure 2 connecting the disc support beam to the main beam), and a plurality of ground engaging rotary discs which are configured to rotate about an axis that extends at a gang angle relative to a perpendicular to the draft direction. Concerning claim 31, disc harrows 108 & 109 are considered the front disc harrows and disc harrows 44 & 46 are considered the rear disc harrow as viewed from the view shown in figure 4.

Allowable Subject Matter

Claim 33 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 3671

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
